Professional Summary

Software Engineer with 2+ years of experience building production web applications and AI/LLM systems using Python, FastAPI, React, Node.js, PostgreSQL, and AWS. Experienced in LLM application development, prompt engineering, real-time streaming, API development, cloud infrastructure, and full-stack feature ownership.

Experience

Tap Academy **Mar 2025 – Present**

Software Development Engineer 1 (SD1) *Bangalore, Karnataka*

- Developed and shipped multiple production features across the platform, including payment integrations, job portal workflows, and student-facing features.
- Built an AI coding assistant using LLM APIs, prompt engineering, and SSE streaming to provide contextual AI responses and behavior-based assistance for student code interactions.
- Developed LLM-powered applications with prompt optimization, token management, response handling, and guardrails for reliable AI-generated outputs.
- Built and integrated backend APIs using FastAPI and Node.js with React-based interfaces, owning features across the frontend and backend.
- Worked with AWS infrastructure including EC2 application management and S3 storage/integration for production workflows.

Quanta **Jul 2024 – Feb 2025**

Software Development Engineer 1 (SD1) *Bangalore, Karnataka*

- Built production-ready web applications using React, Python, FastAPI, and Flask across frontend, backend, and API layers.
- Developed scalable REST APIs and asynchronous backend services for real-time synchronization and concurrent workloads.
- Built reusable backend modules, database integrations, and third-party API workflows for production application features.

Skills

AI/LLM: LangGraph, LangChain, LLM Integration, RAG, Agentic Workflows, Prompt Engineering, Vector Databases, pgvector, Mem0, SSE Streaming, AI Agents

Languages: Python, JavaScript, TypeScript

Frontend: React, React Native, Expo, Redux, Zustand, Tailwind CSS

Backend: FastAPI, Node.js, Express.js, Flask, REST APIs, Microservices, Prisma, Docker

Databases: PostgreSQL, MongoDB, MySQL, pgvector, SQL Optimization

Cloud/DevOps: AWS, EC2, S3, Firebase, Supabase, VPS, CI/CD, Git

Projects

AI Resume Builder | *FastAPI, React, OpenAI, PostgreSQL, LaTeX, Docker, VPS* **2026**

- Built an AI resume-tailoring platform that analyzes JD fit and generates ATS-focused one-page PDFs using a self-correcting LaTeX generate–compile–verify pipeline.
- Dockerized the LaTeX compilation environment with controlled dependencies and automated error recovery, optimizing generation reliability through compile validation, retries, and output verification.

AI Fitness Coach | *LangGraph, FastAPI, React Native, pgvector, Mem0, SSE* **2025**

- Built a React Native agentic AI fitness application with LangGraph, FastAPI, and multiple domain-specific tools for personalized interactions.
- Implemented Mem0/pgvector context retrieval, parallel processing, and real-time SSE streaming for low-latency AI responses.

MindSnack Quiz Builder | *React, TypeScript, Node.js, Express, Prisma, PostgreSQL, VPS* **2025**

- Built a production quiz and survey platform with JSON-driven workflows, reusable APIs, authentication, analytics, and payment lead management.
- Developed Node.js/Express backend services and handled VPS deployment, environment configuration, database connectivity, and production maintenance.

AI Coding Assistant — Tap Academy | *LLM APIs, Python, FastAPI, React, Prompt Engineering, SSE* **2025–2026**

- Built an AI coding assistant that analyzes student code and generates contextual feedback and behavior-based AI responses using LLM APIs.
- Designed prompt-engineering and token-optimization workflows with real-time SSE streaming, response formatting, and AI guardrails.

Education

PRESIDENCY UNIVERSITY **2020 – 2024**

B.Tech Computer Science & Engineering (Data Science) – CGPA 7.95 *Bangalore, Karnataka*
